Kilnformed Glass Artist

Bachelor of Fine Arts – Art Education at Virginia Commonwealth University.

Mother, Business Owner, Cook, Teacher and always Artist.

I've been working with glass about 16 years, starting with stained glass and very quickly moved on to 'glass fusion.' I bought a kiln and started melting glass and have never looked back. I take classes annually at Vitrum Studios to keep up with new innovations and connect with my peers.

Combinations of mechanical parts and botanical arrangements make my works feel correct. I enjoy the color combinations as much as the shapes they embody.
