Statement:

An adherent of the artistic approach called Contemplative Photography, I roam my environment, camera nearby, staying acutely sensitive to any events of synchronicity within the elements of our physical environment, events where "things" just align... fall into place. When I see such a photograph one that NEEDS TO BE TAKEN, I engage the technical skills accrued over the past 50+ years and do my best to capture the magic moment that I perceive. From that point my duty is to convert the etherial image into a physical representation I can share with my fellow travelers.
